DIAMOND SANDING / POLISH DISCS - These discs are made of a unique blend of diamond powders mixed with resins which is applied to a tough synthetic pressure sensitive adhesive (PSA) backing pad. Each mesh size diamond is a different color allowing easy identification of diamond size. The color is also an easy way to determine the condition of the pad. AS LONG AS YOU HAVE COLOR, YOU HAVE DIAMONDS!!! These discs provide a superior polish. THEY ARE WHAT I USE!!! These discs **MUST** be run WET!!!!

FACETING DISCS - HARD

FACET DISCS - These discs are made from a metal alloy backing plate precision machined and balances. The nickel bonded diamond topper plate is applied using a hydraulic press. This results in a superior lapping plate. Discs come with standard 1/2" diameter arbor hole.

DIAMOND MESH SIZE	6" DIAMETER DISC 1/2" ARBOR HOLE		8" DIAMETER DISC 1/2" ARBOR HOLE	
	MLS PART No.	Price	MLS PART No.	Price

NuBond Laps - Multilayer NuBond laps have a higher concentration of friable, self sharpening diamonds bonded directly to a solid aluminum backer, NuBond laps are precise and true running, lightweight and corrosion resistant. 1/2" Arbor hole.

UNCHARGED LAPS - All uncharged lapping discs are precision machined for good balance and minimal vibration. They come in several type of materials to be charged by the craftsman with his or her personal preference of diamond or other abrasives. All uncharged lapping discs come with 1/2" diameter arbor hole.
