The MK or BD-303 PROFESSIONAL

is currently the state of the art technology in diamond saw blades. The 303 is a sintered rim blade with very high diamond content. The PROFESSIONAL is today's producer of smooth cuts and are used for cutting rare and valuable materials when waste must be held to a minimum and speed of cut is essential. This blade lasts longer and will cut faster than ordinary notched rim or plated diamond blades. They can be used at maximum arbor speeds. **I USE THESE BLADES MYSELF, THEY ARE THE FINEST BLADE I HAVE EVER USED!!!!** PLEASE NOTE, BD, Barranca Diamond is a wholly owned subsidiary of MK Diamond. They are the exact same blade except for the label.
