DIAMOND SANDING / POLISH WHEELS

These **DIAMOND SANDING / POLISHING WHEELS**, also known as diamond soft wheels, are made by bonding a layer of diamonds and resin to the perimeters of a foam backed wheel. The diamonds are securely held in place for many hours of sanding and polishing.

The **Eastwind FLEX WHEELS** are constructed of nylon cores. A layer of tough closed cell foam padding with an outer layer of canvas is applied over this core with a final outside layer of flexible resin and diamonds. These wheels need to be broken in! Made in the U.S.A.

The **Diamond Pacific NOVA** wheels are constructed of nylon cores. A layer of tough closed cell foam padding is applied over this core with a final outside layer or flexible resin and diamonds bonded to a outer canvas layer. These wheels need break-in. Made in the U.S.A.

SINTERED DIAMOND WHEEL

The **BEST** Diamond Grinding Wheel on the MARKET!!! Constructed with a solid metal core with a 3.5 mm layer of DIAMOND/METAL Matrix around the perimeter of the wheel. With proper care this wheel will cut as fast for its' entire life as when it is fresh out of the box. This style wheel has a **MUCH** extended (better than 10 the life of a rim plated wheel.

SINTERED RIM DIAMOND WHEELS
